

SCREEN-CHEM ANTIGHOST

Code: AM100036

PRODUCT DESCRIPTION

Product for the removal of “ghost images” after the recovery of the screens.

GENERAL & TECHNICAL FEATURES

- Solvent-free
- Suitable for both polyester and nylon meshes
- Indicated for the removal of every kind of photo-emulsion, provided that it has not been catalyzed and varnished
- Highly effective in the removal of “ghost images” and marks, originated by the “dyeing” action of the inks onto the screens

PREPARATION

Is a ready-to-use product. It is recommended to mix the product, before using it.

SCREEN-CHEM ANTIGHOST is a caustic product, so it is recommended to work with the appropriate Individual Protection Devices.

APPLICATION

Apply the product through a sponge on the areas of the screen that are to be treated.

Once the product has been applied, it is suggested to let it act for about 15-20 minutes.

The action duration is related to the conditions of the mesh: the higher are the marks, the longer must be the action time. However, it mustn't be absolutely higher than 60 minutes.

If a stronger performance is required, we recommend to use a mixture of **SCREEN-CHEM ANTIGHOST** and **SCREEN-CHEM ANTIGHOST ADDITIVO** that is even more effective than the use of the single products.

Remove well, through a high pressure nozzle.

The screens, that have been treated with **SCREEN-CHEM ANTIGHOST** must be subsequently degreased through specific cleansers (**SCREEN-CHEM DEGREASER**) before using them again.
